FEATURES

CORE STRATEGY

Backgammon rebuilt as a roguelite with deeper choices and rising tension.

BOARDS

Distinct boards with unique themes and rule twists.

PROGRESSION

A nine-ante run, three matches per ante, and escalating difficulty.

An adaptive opponent that grows tougher each ante.

MODIFIERS

STYLE

Casino-inspired visuals, crisp animation, and tactile sound.

GAME PILLARS

CHANCE

Dice manipulation, modifiers, and relics give players ways to bend luck without eliminating randomness.

REPLAYABILITY

Nine-ante runs, 150+ modifiers, themed boards, and boss encounters create long-term mastery and variety.

STREAMERS

Auto-rollout, deck-breaking synergies, and PvP finales create highly shareable, spectator-friendly moments.

STRATEGY

Classic Backgammon movement extended through deck-building, synergies, and run-based progression.

MARKETING

Our strategy focuses on Steam visibility, wishlist growth, influencer discovery, and roguelite-friendly community channels. Titles like *Balatro*, *Slay the Spire*, and *Luck Be a Landlord* show strong performance driven by streamers, Reddit theorycrafting, and YouTube long-form playthroughs.

Acey Deucey targets the 18–34 strategy-focused audience, with proven appetite for probability-driven roguelites, escalating stakes, and high replay value.

A playable demo, visually distinctive art direction, and a streamer-ready “break the game” loop position the title for organic traction on zero budget.
